Experience: Fresher

Employment Type: Full-Time with 2 months training program

Job Location: Baner, Pune

Stipend during training: 25,000 Rs

CTC after Training: 4,00,000 Rs

Work Mode: Work from Office

Department: IT

About the Role

IntelliSource Technologies Pvt. Ltd. is looking for a motivated and analytical **Database Developer – Trainee** to join our software development team.

This is an entry-level opportunity for fresh graduates who want to build a career in database development, SQL programming, and database reporting. The selected candidate will receive practical exposure to real-world enterprise applications and work closely with experienced database developers, software developers, quality assurance analysts, and business analysts.

The role primarily involves working with **Microsoft SQL Server, T-SQL, stored procedures, database objects, query optimization, and SQL Server Reporting Services (SSRS)**. The selected candidate will also assist in developing and maintaining reports and troubleshooting data and reporting-related issues.

Key Responsibilities

- Understand application and reporting requirements and translate them into appropriate database solutions.
- Write SQL queries to retrieve, insert, update, and manage application data.
- Develop and maintain stored procedures, functions, views, and database scripts.
- Create and modify database tables and other database objects as required.
- Develop, modify, and maintain SSRS reports based on business requirements.
- Perform data validation and investigate data-related issues.
- Support software developers, QA analysts, and business analysts in identifying and resolving database and reporting-related issues.
- Assist in optimizing SQL queries, stored procedures, and report datasets for improved performance.

Required Technical Skills

- Good understanding of relational database concepts.
- Basic to good knowledge of SQL and T-SQL.
- Ability to write SELECT, INSERT, UPDATE, and DELETE queries.
- Understanding of primary keys, foreign keys, and table relationships.
- Knowledge of different types of SQL joins.
- Understanding of subqueries and aggregate functions.
- Basic knowledge of stored procedures, functions, and views.
- Understanding of database normalization concepts.
- Basic knowledge of indexes and their purpose.
- Basic understanding of reporting concepts.
- Awareness of SQL Server Reporting Services (SSRS).
- Good analytical, logical, and problem-solving skills.

Good to Have

- Knowledge of Microsoft SQL Server.
- Familiarity with SQL Server Management Studio (SSMS).
- Hands-on exposure to SSRS.
- Familiarity with Git, Azure DevOps, or other version-control and work-management tools.
- Exposure to .NET or web application development concepts.

Educational Qualification

- B.E. / B.Tech in Computer Science, Information Technology, or a related field.
- Recent graduates and candidates with up to 1 year of relevant experience may apply.

Candidate Profile

We are looking for candidates who:

- Have a genuine interest in SQL, database development, and reporting.
- Enjoy solving logical and data-related problems.
- Have strong analytical and troubleshooting skills.
- Are comfortable working with data and understanding complex relationships.
- Pay close attention to data accuracy and report presentation.
- Are willing to learn advanced SQL, SSRS, and database optimization techniques.
- Can understand technical and reporting requirements and convert them into appropriate solutions.
- Are comfortable asking questions and seeking clarification when requirements are unclear.
- Follow a disciplined approach to coding, reporting, documentation, and process compliance.

- Have a proactive attitude toward learning and continuous improvement.
- Can take ownership of assigned tasks and complete them within agreed timelines.

Why Join IntelliSource Technologies?

- Opportunity to work on real-world enterprise applications, databases, and reports.
- Hands-on experience with Microsoft SQL Server, T-SQL, and SSRS.
- Practical learning and mentorship from experienced professionals.
- Exposure to complex business data and reporting requirements.
- Opportunity to work closely with development, QA, and business teams.
- Structured career growth based on performance and skill development.
- Collaborative and professional work environment.
