Professional Summary

Fourth-year B.E. student in Artificial Intelligence and Machine Learning seeking an entry-level Database Developer / Trainee opportunity. Hands-on experience through a Software Engineer internship, academic projects, and SQL-focused coursework in database development, SQL, PostgreSQL, Microsoft SQL Server, T-SQL, REST APIs, reporting dashboards, and full-stack applications. Strong understanding of relational databases, CRUD operations, database integration, reporting, and data processing, with foundational knowledge of stored procedures and SQL Server Reporting Services (SSRS). Able to understand technical requirements and develop practical solutions related to database-driven business applications.

Technical Skills

Programming: C++, JavaScript (ES6), SQL, T-SQL (Basic)

Databases: PostgreSQL, Microsoft SQL Server (Basic), SQLite, Relational Databases

SQL Server: T-SQL, Stored Procedures (Foundational), SSRS (Foundational), SSMS

Backend: Node.js, Express.js, REST APIs, EJS, JWT Authentication

Frontend: React.js, React Hooks, HTML5, CSS3, Bootstrap 5, jQuery

Database Concepts: SQL Queries, CRUD Operations, Connection Pooling, Database Integration, Data Management

Reporting: Reporting Dashboards, Attendance Reporting, Data Tracking, CSV Data Processing, Operational Reporting

Tools: Git, GitHub, Postman, pgAdmin, SQL Server Management Studio

Cloud: Azure (Foundational), Render, Vercel

Internship Experience

BracketDex Technologies

Software Engineer Intern

July 2026

Pune, Maharashtra

- Contributed to a SchoolERP application using Express.js and PostgreSQL, working with a relational database containing **31 tables** across multiple business entities and related application workflows.
- Developed REST APIs with JWT authentication and integrated frontend applications with backend services and SQL-based data operations.
- Built a React.js teacher application with SQLite/localStorage support, enabling attendance marking in **under 30 seconds**.
- Developed a Next.js administrative reporting dashboard for attendance telemetry, absentee tracking, and centralized operational reporting.
- Implemented CSV bulk-data import using PapaParse, supporting onboarding of **1,000+ students per batch** and simplifying repetitive student data-entry activities.
- Worked with SQL, relational data, reporting requirements, data processing, and database-driven workflows while solving real-world ERP requirements related to attendance and student management.
- Developed practical understanding of T-SQL, stored procedures, reporting concepts, SQL Server, and SSRS through database-focused learning and application requirements.
- Collaborated with the development team on debugging, task execution, source-code management, and version control using **Git and GitHub**.

Academic & Hands-on Projects

EasyLeasy – Property Management System

React.js, Node.js, Express.js, PostgreSQL, SQL, JWT Authentication

July 2026

- Developed a full-stack property management system for managing properties, units, tenants, leases, rental records, and maintenance information through a centralized relational database.
- Implemented SQL-backed CRUD operations and integrated PostgreSQL with the Node.js backend for structured application data management.
- Built separate Landlord and Tenant portals using JWT-based role-based access control for secure access to related application data.
- Developed a maintenance reporting and ticket-tracking workflow with **3 status stages**: Open, In-Progress, and Resolved.
- Implemented automated monthly rent-payment workflows and email notifications through Gmail SMTP for recurring tenant communication.
- Deployed the application on Render with a cloud PostgreSQL database, secure password handling, and tenant onboarding through email invitation links.

MyBlogWebsite

Node.js, Express.js, PostgreSQL, SQL, EJS, Bootstrap

- Developed a full-stack blogging platform implementing complete CRUD functionality for creating, reading, updating, and deleting blog posts.
- Integrated PostgreSQL using the pg library and connection pooling for reliable relational database persistence.
- Developed backend routes and SQL-based database operations using Node.js and Express.js, strengthening practical SQL

and database development knowledge.

- Implemented environment-based configuration using `.env` to separate database credentials and application configuration from source code.

Relevant Coursework & Database Knowledge

- **SQL:** SELECT, INSERT, UPDATE, DELETE, filtering, joins, aggregation, grouping, relational data handling, and CRUD operations.
- **SQL Server:** Basic Microsoft SQL Server, T-SQL, and SSMS knowledge for relational database development.
- **Stored Procedures:** Foundational understanding of stored procedures, parameters, reusable database-side logic, and database-driven application workflows.
- **SSRS:** Foundational understanding of SQL Server Reporting Services, data-driven reports, reporting concepts, and structured database information.
- **Reporting:** Practical experience with attendance dashboards, absentee tracking, operational telemetry, CSV-based data processing, and reporting-oriented workflows.
- **Database Development:** Practical understanding of relational database design, application-database integration, connection pooling, data persistence, and database-related troubleshooting.

Education

Zeal College of Engineering and Research, Narhe, Pune

Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning

2023 – Present

Savitribai Phule Pune University

- Overall GPA: **8.41/10**
- Secured **Department Rank 3** in the 2nd Semester University Examination with a **9.5 SGPA**.

Leadership & Achievements

- **Team Leader – Smart India Hackathon (SIH) 2025 Internal Rounds:** Led a student team in developing a full-stack web application for fast grocery delivery.
- Coordinated development responsibilities, application planning, implementation, and team collaboration during the SIH internal rounds.
- **Academic Achievement:** Department Rank 3 with **9.5 SGPA** in the 2nd Semester University Examination.

Certifications & Training

- Simplilearn – SQL Project Course Certificate
- HackerRank – JavaScript (Basic) Certificate
- Smart India Hackathon (SIH) – Participation Certificate
- Udemy – Full-Stack Web Development Course by Dr. Angela Yu (Ongoing)
- AWS in Python Training (Ongoing)
