Professional Summary

Fourth-year B.E. student in Artificial Intelligence and Machine Learning with hands-on software engineering experience across full-stack development, SQL databases, REST APIs, authentication, reporting dashboards, and database-driven applications. Strong knowledge of JavaScript, React.js, Node.js, Express.js, SQL, PostgreSQL, SQLite, Git, and GitHub, with foundational understanding of Microsoft SQL Server, T-SQL, and Azure. Experienced in developing ERP-related solutions, data reporting interfaces, role-based applications, and cloud-deployed systems. Demonstrated ability to understand business and technical requirements, collaborate with development teams, and translate requirements into reliable software solutions.

Technical Skills

Programming Languages: C++, JavaScript (ES6), SQL, T-SQL (Basic)
Frontend: HTML5, CSS3, React.js, React Hooks, jQuery, DOM Manipulation
Backend: Node.js, Express.js, EJS, REST APIs, JWT Authentication
Databases: PostgreSQL, SQLite, Microsoft SQL Server (Basic)
Database Concepts: Relational Databases, CRUD Operations, SQL Queries, Database Integration, Connection Pooling
Cloud & Deployment: Azure (Foundational), Render, Vercel
Tools: Git, GitHub, Postman, pgAdmin, SQL Server Management Studio (SSMS)
Additional Knowledge: Reporting Dashboards, Responsive Web Design, Authentication, Role-Based Access Control, CSV Data Processing

Professional Experience

BracketDex Technologies

Software Engineer Intern

July 2026

Pune, Maharashtra

- Contributed to the development of a SchoolERP system using Express.js and PostgreSQL, working with a relational database containing **31 tables** and supporting database-driven business workflows.
- Developed backend functionality and REST API integrations with JWT-based authentication, strengthening practical understanding of secure application development and relational database systems.
- Engineered a React.js application for teachers using SQLite/localStorage, enabling attendance marking in **under 30 seconds** and simplifying daily classroom operations.
- Built a Next.js administrative reporting dashboard for real-time attendance telemetry, absentee tracking, and operational data visibility.
- Implemented CSV bulk-import functionality using PapaParse to support onboarding of **1,000+ students per batch**, reducing repetitive manual data-entry requirements.
- Applied knowledge of SQL, database integration, frontend-backend communication, authentication, and reporting while solving real-world ERP requirements.
- Collaborated with team members on development tasks, code management, and version control using **Git and GitHub**.

Relevant Projects

EasyLeasy – Property Management System

React.js, Node.js, Express.js, PostgreSQL, SQL, JWT Authentication

July 2026

- Designed and developed a full-stack property management system allowing landlords to manage properties, units, tenants, leases, and related records through a centralized database-driven application.
- Built separate Landlord and Tenant portals with role-based access control and JWT authentication to securely manage user-specific operations and information.
- Implemented automated monthly rent-payment workflows and email notifications through Gmail SMTP to support recurring tenant communication.
- Developed a maintenance reporting and ticket-tracking workflow with status transitions from Open to In-Progress to Resolved, improving visibility into maintenance requests.
- Integrated PostgreSQL with the Node.js backend to manage relational application data and support SQL-based CRUD operations.
- Deployed the application on Render with a cloud-hosted PostgreSQL database, encrypted password handling, and secure tenant onboarding through email invitation links.

MyBlogWebsite

Node.js, Express.js, PostgreSQL, SQL, EJS, Bootstrap

- Developed a full-stack blogging platform using Node.js, Express.js, PostgreSQL, and EJS with RESTful CRUD operations for creating, reading, updating, and deleting blog posts.
- Designed SQL-backed application workflows and integrated PostgreSQL using the pg library and connection pooling for reliable data persistence.
- Implemented environment-based configuration using .env to separate sensitive database credentials and application settings from source code.
- Built a responsive interface using EJS and Bootstrap while maintaining clear integration between the frontend, backend, and relational database.

Education

Zeal College of Engineering and Research, Narhe, Pune

Bachelor of Engineering (B.E.) – Artificial Intelligence & Machine Learning

2023 – Present

Savitribai Phule Pune University

- Overall GPA: **8.41/10**
- Secured **Department Rank 3** in the 2nd Semester University Examination with a **9.5 SGPA**.

Leadership & Achievements

- **Team Leader – Smart India Hackathon (SIH) 2025 Internal Rounds:** Led a student team in developing a full-stack web application focused on fast grocery delivery.
- Coordinated development responsibilities and contributed to application planning, implementation, and team collaboration.
- **Academic Achievement:** Secured Department Rank 3 with 9.5 SGPA in the 2nd Semester University Examination.

Certifications & Training

- Simplilearn – SQL Project Course Certificate
- HackerRank – JavaScript (Basic) Certificate
- Smart India Hackathon (SIH) – Participation Certificate
- Udemy – Full-Stack Web Development Course by Dr. Angela Yu (Ongoing)
- AWS in Python Training (Ongoing)
