

Summary

Results-driven **Artificial Intelligence & Machine Learning** undergraduate with hands-on experience in full-stack software development, machine learning, and data-driven applications. Experienced in building scalable web applications using **React, Next.js, Express.js, PostgreSQL, and Python**, along with developing ML solutions using **Scikit-learn** and **NLP** and **RAG** based systems. Strong foundation in software engineering, database design, and Git-based collaboration, with apassion for solving real-world problems through technology.

Experience

BracketDexTechnologies | Software Engineer Intern

June 2026

- Worked on SchoolERP project with **Express.js** & **PostgreSQL** backend with **31 database tables** and **JWT auth**.
- Engineered a React app for teachers with **SQLite/LocalStorage**, enabling attendance marking in **<30 seconds**.
- Created a **Next.js Admin Dashboard** with real-time attendance telemetry, absentee tracking, and **PapaParse CSV** bulk import to onboard **1000+ students** per batch.
- Coordinated team tasks and **version control** using **Git & Github**.

Skills

Programming Languages:

Python, SQL, C++

MachineLearning:

Supervised/UnsupervisedLearning,NeuralNetworks(CNNs,ANNs), Hugging Face Transformers, Feature Engineering
Audio/Image Classification, Video Analytics, NLP

Libraries & Framework:

StreamLit, Scikit-learn, Pandas, Librosa

Tools & MLOps :

Git, Github, Render

Education

BACHELOR OF ENGINEERING

ZEAL COLLEGE OF ENGINEERING AND RESEARCH, NARHE, PUNE, AFFILIATED WITH SAVITRIBAI PHULE PUNE UNIVERSITY
2023 - PRESENT (4th Year)

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

OVERALL GPA = 8.46/10

Projects

CineMatch- Movie recommender System | Python, Pandas, Scikit-learn, and NLP.

June 2026 - July 2026

- Built a **content-based** movie recommender using **5000+** movie dataset using **CountVectorizer** and **Cosine Similarity**.
- Engineered an **NLP** feature pipeline by combining genres, cast, crew, keywords, and overview.
- Integrated the **TMDB API** for real-time movie posters and metadata retrieval.
- Developed and deployed an interactive **Streamlit** application for low-latency recommendations.
- **Maual offline Evaluation** illustration gives **Precision@k=80%**

Music Mood & Genre Classifier | Python ,Librosa, Random Forest

Jan 2026 - April 2026

- Built a Music Genre & Mood Classifier using **Python, Librosa, and Scikit-learn**.
- Extracted **MFCC** and **spectral & Tempo** audio features for music analysis.
- Implemented a **Random Forest** model with **PCA** for genre prediction.
- Developed a **Streamlit** web app for real-time genre and mood classification.

Interactive Video Summarization & QA System | Whisper, BART, DistilBERT, Streamlit

Nov 2025 - Dec 2025

- Implemented speech-to-text using the **OpenAI Whisper model** from **Hugging Face** for MP4 and YouTube video inputs.
- Utilized the **BART-Large-CNN model** to build a summarization pipeline designed to generate summaries of video content.
- Integrated a **DistilBERT Q&A model** to enable question answering based on the generated transcripts.
- Developed a full-stack solution utilizing **Streamlit** to facilitate interactive video explanation.

Achievements

E.E. Department Rank 3 holder in the 2nd Semester University Examination with **9.5 SGPA** .

Position of Responsibility

- **Lead** the team in **SIH2025** Internal Rounds
- **Lead** the team in building a full-stack web application for fast grocery delivery for second year **academic project**.

Certifications & Trainings

- SIH participation ([Certificate](#))
- CyberSecurity with Hierroshield Pvt. Ltd ([Certificate](#))
- PowerBI with Rubicon ([Certificate](#))
- CodSoft Internship Completion ([Certificate](#))

Courses

- Udemy Full-Stack Development Course by Dr. Angela Yu (Ongoing)
- AWS in Python (Ongoing)
-
